Sample, fictional company. Every company, page and answer in this pack is sample data.

What AI says instead, and what to do this week

Kalvenor Systems, Field service management software. Lite pack. Answers captured 2026-07-08 to 2026-07-12. Built 2026-09-28.

47 of 147

answers named Kalvenor Systems (95% interval 25% to 39.9%), on 8 of 10 buyer questions. ChatGPT, Claude, Perplexity, Google AI Overviews and Google AI Mode, three runs each.

Named instead

- **Northvale FSM**: named in 74 of the 100 answers that left you out
- **Asterforge**: named in 30 of the 100 answers that left you out
- **Trakwell**: named in 27 of the 100 answers that left you out

The three questions you lose most

#	Buyer question	You	Named most instead
1	How does field service management software differ from general work order software?	0 of 15	Northvale FSM 11 of 15, Asterforge 9 of 15
2	Which platforms combine scheduling, invoicing and inventory for service teams?	0 of 15	Northvale FSM 9 of 15, Orbit Field 8 of 15
3	Which field service management systems keep working offline in the field?	3 of 14	Northvale FSM 11 of 14, Verano FSM 6 of 14

This week: five actions

#	Action	Owner	In this pack	Done when
1	Publish the answer page for "How does field service management software differ from general work order software?"	Content lead	Part 3, draft A	The page is live at a stable URL on kalvenor.example and linked from a hub page
2	Ask hvacoperations.example to consider Kalvenor Systems for "HVAC Operations: field service platforms compared"	Product marketing	Part 5, request 1	Sent from a named company address and logged with the date; one follow-up at most

#	Action	Owner	In this pack	Done when
3	Add Organization and Product JSON-LD and the sameAs list to the homepage	Web lead	Part 4	The Schema Markup Validator reads Organization and Product on https://kalvenor.example/
4	Create or complete the Kalvenor Systems listing on fieldservicereview.example	Product marketing	Part 4, listings	fieldservicereview.example lists Kalvenor Systems on a dated check
5	Publish the answer page for "Which platforms combine scheduling, invoicing and inventory for service teams?"	Content lead	Part 3, draft B	The page is live and linked from a hub page

How each engine reads you

Engine	Named you	Of those, cited your site
ChatGPT	15 of 29	6 of 15
Claude	13 of 30	3 of 13
Perplexity	9 of 29	3 of 9
Google AI Overviews	1 of 29	0 of 1
Google AI Mode	9 of 30	5 of 9

Claude names you mostly from other pages, so the Source Map in Part 2 is the lever for it.

Sample, fictional company. Order SAMPLE-KALVENOR-FICTIONAL. Answers captured 2026-07-08 to 2026-07-12. Observed answers on stated dates, not a ranking. Every figure comes from the published method, v1.1.

Sample, fictional company. Every company, page and answer in this pack is sample data.

Part 1b. Why the rivals win, in the engines' own words

Short excerpts from answers that named each rival and left Kalvenor Systems out. Each carries its receipt id. The answer page drafts in Part 3 answer the same buying criteria with your own facts.

What the answers that left you out tell buyers to check

- "The answer advises checking offline behaviour, contract length and data export before signing." (100 answers; first receipt sample-kalvenor|q1|ChatGPT|1)

Northvale FSM: named in 74 of the 100 answers that left you out

- The answers name Northvale FSM without a short, quotable reason. The questions where it takes your place are in the receipts appendix.

Checked Source Map pages that list Northvale FSM: servicetechforum.example, trakwell.example, asterforge.example, cindermark.example, northvalefsm.example, orbitfield.example.

Asterforge: named in 30 of the 100 answers that left you out

- The answers name Asterforge without a short, quotable reason. The questions where it takes your place are in the receipts appendix.

Checked Source Map pages that list Asterforge: hvacoperations.example, asterforge.example, cindermark.example, trakwell.example, northvalefsm.example, orbitfield.example.

Trakwell: named in 27 of the 100 answers that left you out

- The answers name Trakwell without a short, quotable reason. The questions where it takes your place are in the receipts appendix.

Checked Source Map pages that list Trakwell: trakwell.example, asterforge.example, cindermark.example, hvacoperations.example.

Part 1c. Prices the answers state next to your name

No answer stated a dollar figure in the same sentence as Kalvenor Systems.

Sample, fictional company. Order SAMPLE-KALVENOR-FICTIONAL. Answers captured 2026-07-08 to 2026-07-12. Observed answers on stated dates, not a ranking. Every figure comes from the published method, v1.1.

Sample, fictional company. Every company, page and answer in this pack is sample data.

Part 2. The Source Map

From 147 answers recorded on 2026-07-08 to 2026-07-12, 111 distinct pages cited. Ranked by how many answers that left you out cited each page; the second count is over all 147 answers.

A page cited today may not be cited next month. Listing status was checked on 2026-07-13 by reading the sample fixture pages for this fictional company.

Of the 25 pages checked, 1 lists Kalvenor Systems, 22 do not, and 2 could not be checked. By type: 1 community thread, 6 editorial roundup, 17 vendor page, 1 directory or review site.

#	Page	Left you out / all	What it is	Lists you	Rivals it lists
1	https://servicetechforum.example/core/10	7 / 7	community thread	No	Northvale FSM, Orbit Field

Page by page: route and the ask

1. Forum thread: Which platforms combine scheduling, invoicing and inventory for service teams https://servicetechforum.example/core/10

- Cited by Claude (2), Google AI Overviews (2), Perplexity (2), Google AI Mode (1) on q10.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: community, community thread, reply in the thread.
- The ask: No ask to the owner. If you reply, reply as a named, disclosed employee and add one checkable fact.

2. HVAC Operations: field service platforms compared https://hvacoperations.example/core/5

- Cited by Perplexity (1), Google AI Mode (2), ChatGPT (1), Google AI Overviews (1) on q5.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: submission email, editor@hvacoperations.example.
- The ask: Ask the editor to consider Kalvenor Systems for this list, with one checkable fact (Part 5).

3. Trakwell: What is field service management software https://trakwell.example/core/1

- Cited by ChatGPT (2), Perplexity (1), Google AI Mode (2), Claude (2) on q1.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

4. Trakwell: Which field service platforms handle recurring maintenance contracts https://trakwell.example/core/6

- Cited by ChatGPT (2), Perplexity (1), Google AI Overviews (2), Claude (2), Google AI Mode (1) on q6.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

5. Asterforge: Which field service platforms handle recurring maintenance contracts https://asterforge.example/core/6

- Cited by ChatGPT (1), Claude (1), Perplexity (1), Google AI Mode (1), Google AI Overviews (1) on q6.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

6. Cindermark: Which field service platforms handle recurring maintenance contracts https://cindermark.example/core/6

- Cited by ChatGPT (3), Claude (1), Google AI Mode (1), Perplexity (1) on q6.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

7. Northvale FSM: Which platforms combine scheduling, invoicing and inventory for service teams https://northvalefsm.example/core/10

- Cited by Google AI Overviews (2), Google AI Mode (1), Claude (1) on q10.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

8. Orbit Field: What is field service management software https://orbitfield.example/core/1

- Cited by Perplexity (2), Google AI Overviews (1), Claude (1), Google AI Mode (1) on q1.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.

- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

9. Trakwell: Which software helps a company schedule and dispatch field technicians https://trakwell.example/core/2

- Cited by ChatGPT (1), Google AI Mode (2), Perplexity (1) on q2.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

10. Trakwell: Which field service management systems keep working offline in the field https://trakwell.example/core/8

- Cited by ChatGPT (2), Perplexity (1), Google AI Overviews (1), Claude (1) on q8.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

11. Asterforge: Which platforms combine scheduling, invoicing and inventory for service teams https://asterforge.example/core/10

- Cited by Google AI Overviews (1), Perplexity (1), ChatGPT (1) on q10.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

12. Asterforge: What are the strongest field service management platforms for a mid sized service business https://asterforge.example/core/3

- Cited by Claude (3), Google AI Overviews (2), Perplexity (1), ChatGPT (1) on q3.
- Lists Kalvenor Systems: Yes (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

13. Asterforge: How does field service management software differ from general work order software https://asterforge.example/core/5

- Cited by Google AI Overviews (2), ChatGPT (1) on q5.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

14. Cindermark: Which software helps a company schedule and dispatch field technicians https://cindermark.example/core/2

- Cited by Claude (2), ChatGPT (1), Google AI Mode (1), Perplexity (1) on q2.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

15. Cindermark: What features should field service management software include https://cindermark.example/core/4

- Cited by Claude (1), ChatGPT (1), Google AI Overviews (1), Google AI Mode (1) on q4.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

16. Field Service Review: compare field service management software https://fieldservicereview.example/core/1

- Cited by Claude (2), Perplexity (1), Google AI Mode (1) on q1.
- Lists Kalvenor Systems: Could not check (page needs a browser to read) (checked 2026-07-13).
- Contact route: listing form, https://fieldservicereview.example/get-listed.
- The ask: Open the page and check it by hand; the automatic check said: page needs a browser to read.

17. HVAC Operations: field service platforms compared https://hvacoperations.example/core/1

- Cited by Google AI Overviews (1), Google AI Mode (1), ChatGPT (1), Perplexity (1) on q1.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: submission email, editor@hvacoperations.example.
- The ask: Ask the editor to consider Kalvenor Systems for this list, with one checkable fact (Part 5).

18. HVAC Operations: field service platforms compared https://hvacoperations.example/core/10

- Cited by Google AI Overviews (1), Claude (1), ChatGPT (1) on q10.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: submission email, editor@hvacoperations.example.
- The ask: Ask the editor to consider Kalvenor Systems for this list, with one checkable fact (Part 5).

19. HVAC Operations: field service platforms compared https://hvacoperations.example/core/2

- Cited by Claude (2), Google AI Overviews (1) on q2.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: submission email, editor@hvacoperations.example.
- The ask: Ask the editor to consider Kalvenor Systems for this list, with one checkable fact (Part 5).

20. HVAC Operations: field service platforms compared https://hvacoperations.example/core/8

- Cited by Google AI Overviews (1), Google AI Mode (1), ChatGPT (1), Perplexity (1) on q8.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: submission email, editor@hvacoperations.example.
- The ask: Ask the editor to consider Kalvenor Systems for this list, with one checkable fact (Part 5).

21. Northvale FSM: What features should field service management software include https://northvalefsm.example/core/4

- Cited by Google AI Overviews (3) on q4.
- Lists Kalvenor Systems: No (checked 2026-07-13).

- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

22. Northvale FSM: How does field service management software differ from general work order software https://northvalefsm.example/core/5

- Cited by ChatGPT (2), Perplexity (1) on q5.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

23. Operations Weekly: field service software news and comparisons https://operationsweekly.example/core/4

- Cited by Claude (1), Google AI Overviews (1), Perplexity (1) on q4.
- Lists Kalvenor Systems: Could not check (page needs a browser to read) (checked 2026-07-13).
- Contact route: submission email, news@operationsweekly.example.
- The ask: Open the page and check it by hand; the automatic check said: page needs a browser to read.

24. Orbit Field: Which platforms combine scheduling, invoicing and inventory for service teams https://orbitfield.example/core/10

- Cited by Perplexity (1), Google AI Mode (1), Google AI Overviews (1) on q10.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

25. Orbit Field: How does field service management software differ from general work order software https://orbitfield.example/core/5

- Cited by Perplexity (1), Google AI Mode (1), Google AI Overviews (1) on q5.
- Lists Kalvenor Systems: No (checked 2026-07-13).
- Contact route: vendor page, no route.
- The ask: No ask: this is a vendor's own page. Answer the same question on your own site (Part 3).

Part 3, draft A: "How does field service management software differ from general work order software?"

Why this question: Kalvenor Systems was named in 0 of 15 answers; Northvale FSM in 11, Asterforge in 9.

Title	Meta description	H1	Suggested URL
Field Service vs. Work Order Software: Key Differences	Learn how field service management software differs from general work order tools, and what to check before you choose: offline use, contracts and data export.	How Field Service Management Software Differs from General Work Order Software	/field-service-vs-work-order-software

How Field Service Management Software Differs from General Work Order Software

Short answer. Work order software tracks tasks and maintenance records. Field service management software adds dispatch, mobile tools for technicians in the field, invoicing and customer communication. If your team drives to job sites, you need the field-focused features: live scheduling, offline mobile access and billing built around completed jobs.

What work order software is built to do

Work order software is designed for facilities and service teams that manage assets, schedule preventive maintenance and track storeroom inventory. For example, Asterforge describes itself as "work order and preventive maintenance software for facilities and service teams". It triggers recurring maintenance from asset records and meter readings, and its inventory module covers storeroom stock.

That model works well when your technicians stay on one site or campus. The software assumes a relatively fixed location, so features like live dispatch, route planning and customer arrival notices are not the focus.

What field service management software adds

Field service management software is built around the moment a technician leaves the office and drives to a customer. We built Kalvenor Systems for HVAC, plumbing and electrical contractors with 10 to 200 technicians. Our platform handles scheduling, dispatch and invoicing, and the mobile app continues working even without a signal.

A dispatcher can drag a job to a new technician on the live board, and the technician sees the update on their phone within seconds. When the job is done, the invoice is assembled from the recorded labor time and parts used, then synced to QuickBooks Online or Xero. That closed loop, from dispatch to payment, is what separates field service software from a general work order tool.

Offline capability matters in the field

Technicians often work in basements, rural areas or buildings with poor signal. Each morning, that day's jobs are stored on the device, so technicians can open job details, customer history and equipment records without any connection. Time entries, parts, photos, checklists and customer signatures are captured offline and sync automatically once the device reconnects.

Card payments do require a connection, but the app queues the invoice so the technician can collect payment as soon as they are back online. Before you choose any platform, confirm how it handles offline work, because behavior varies across products.

Things to check before you sign

Contract length is worth examining closely. Northvale FSM requires annual contracts on every plan. We offer monthly billing with no annual contract, though it is priced at a higher rate, and there is no setup fee on any plan.

Data portability is another practical concern. You should be able to export your jobs, customers, invoices and inventory records at any time. We allow CSV export of all those record types whenever you need it. A REST API with webhooks is also available on our Professional and Enterprise plans. Ask any vendor how you get your data out before you commit.

How the options compare

The table below uses each company's own published information. Check each vendor's site for current details.

Criterion	Kalvenor Systems	Northvale FSM	Asterforge
Primary focus	Scheduling, dispatch, invoicing and mobile tools for trade contractors with 10 to 200 technicians.	Field service management for service organizations with 50 or more technicians.	Work order and preventive maintenance software for facilities and service teams.
Offline mobile app	Jobs, time, parts, photos, checklists and signatures are captured offline and sync when the device reconnects.	"The Northvale mobile app supports offline work orders on Android and iOS".	[confirm: check Asterforge site for offline mobile capability]
Accounting integrations	Invoices, payments and customers sync in both directions with QuickBooks Online and Xero.	Connects to NetSuite and Microsoft Dynamics 365 for accounting.	[confirm: check Asterforge site for accounting integrations]
Contract terms	Monthly billing is available with no annual contract, and there is no setup fee.	Annual contracts are required on all plans.	[confirm: check Asterforge site for contract terms]
Pricing model	Plans are priced per technician per month; office users are included at no extra charge.	Pricing is quoted per organization after a demo.	Standard costs $45 per user per month; Plus costs $75 per user per month.

Frequently asked questions

Can I try Kalvenor Systems before I commit? Yes. Every plan includes a 14 day trial with sample data already loaded so you can explore the platform right away.

What happens to my data if I leave? You can export jobs, customers, invoices and inventory to CSV at any time. Professional and Enterprise plans also include a REST API with webhooks for more automated data access.

Is Kalvenor Systems suitable for a team that does recurring maintenance contracts? Yes. On the Professional plan, recurring maintenance agreements generate visits on the schedule you set, with the checklist and parts list attached. Those visits appear on the dispatch board automatically.

Part 3, draft B: "Which platforms combine scheduling, invoicing and inventory for service teams?"

Why this question: Kalvenor Systems was named in 0 of 15 answers; Northvale FSM in 9, Orbit Field in 8.

Title	Meta description	H1	Suggested URL
Scheduling, Invoicing and Inventory for Service Teams	Compare platforms that combine scheduling, invoicing and inventory for field service teams. See how Kalvenor Systems, Northvale FSM and Orbit Field differ.	Which platforms combine scheduling, invoicing and inventory for service teams?	/scheduling-invoicing-inventory-field-service

Which platforms combine scheduling, invoicing and inventory for service teams?

Short answer. Several platforms bring scheduling, invoicing and inventory together for field service teams. Kalvenor Systems, Northvale FSM and Orbit Field each cover parts of that combination. Before you sign, check how each platform behaves offline, what contract terms apply and how easily you can export your data.

What Kalvenor Systems covers

Kalvenor Systems is field service management software built for HVAC, plumbing and electrical contractors with between 10 and 200 technicians. Scheduling, dispatch and invoicing are included in every plan, alongside a mobile app that continues to work without a signal.

Dispatchers move jobs by dragging them onto a live board, and technicians see the update on their phones within seconds. When a job is finished, an invoice is built automatically from the labor time and parts recorded on site, and it syncs to QuickBooks Online or Xero.

Parts are tracked in the warehouse and on each truck. When a technician logs a part against a job, the quantity drops from that truck and the part appears on the invoice. A reorder alert fires when stock falls below the threshold you choose.

Offline behaviour: what happens with no signal

Each morning, the day's jobs are stored on the device so technicians can open job details, customer history and equipment records even with no connection. Time, parts, photos, checklists and customer signatures are captured offline and upload automatically once the device reconnects.

Card payments do require a connection, and the app holds the invoice in a queue until the technician is back online. If two people edit the same job while one is offline, the app keeps both sets of changes and flags the job for a dispatcher to review.

Northvale FSM also supports offline work orders on Android and iOS. Orbit Field's offline behaviour is [confirm: check Orbit Field's offline capability on their site].

Contracts, pricing and data export

Kalvenor Systems plans are priced per technician per month and billed annually. The Starter plan costs $59 per technician per month and covers scheduling, dispatch, the offline mobile app and invoicing. The Professional plan costs $89 per technician per month and adds recurring maintenance agreements, truck inventory and accounting sync. Monthly billing is available at a higher rate with no annual contract required.

You can export jobs, customers, invoices and inventory to CSV at any time. Technician schedules can also be sent to Google Calendar or Outlook. A REST API with webhooks is available on the Professional and Enterprise plans.

Northvale FSM requires annual contracts on all plans. Northvale FSM pricing is quoted per organisation after a demo. Orbit Field Core costs $49 per month for one user, and "Orbit Field Team costs $169 per month for up to five users". Orbit Field's contract terms and data export options are [confirm: check Orbit Field's terms and export features on their site].

How the three platforms compare

The table below uses each company's own published information. Verify current details on each vendor's site before making a decision.

Criterion	Kalvenor Systems	Northvale FSM	Orbit Field
Target team size	10 to 200 technicians, focused on HVAC, plumbing and electrical contractors.	Service organisations with 50 or more technicians.	Small home service businesses.
Scheduling and dispatch	Live drag-and-drop board with skills matching and route order; updates reach technicians within seconds.	Scheduling and dispatch are included.	Scheduling is included alongside online booking.
Invoicing	Invoices are generated from completed jobs, including labor and parts, and sync to QuickBooks Online and Xero.	Invoicing is included; accounting connects to NetSuite and Microsoft Dynamics 365.	Invoicing is included and syncs to QuickBooks Online.
Inventory tracking	Parts tracked in the warehouse and on each truck, with reorder alerts and automatic deduction when parts are logged on a job.	[confirm: check Northvale FSM inventory features on their site].	[confirm: check Orbit Field inventory features on their site].
Offline mobile app	Jobs, time, parts, photos, checklists and signatures all work offline and sync when reconnected.	Offline work orders are supported on Android and iOS.	[confirm: check Orbit Field offline capability on their site].
Contract flexibility	Annual billing is standard; monthly billing is available at a higher rate with no annual contract.	Annual contracts are required on all plans.	[confirm: check Orbit Field contract terms on their site].

Frequently asked questions

Does Kalvenor Systems include inventory tracking alongside scheduling and invoicing? Yes. Parts are tracked in the warehouse and on each truck. When a technician records a part on a job, the

quantity is deducted from that truck and added to the invoice automatically. Reorder alerts fire when stock drops below the level you set.

Can I export my data if I decide to leave? Jobs, customers, invoices and inventory can all be exported to CSV at any time. Technician schedules can be sent to Google Calendar or Outlook. A REST API with webhooks is also available on the Professional and Enterprise plans.

Is there a free trial and is a setup fee charged? Every plan includes a 14 day trial with sample data already loaded. There is no setup fee, and each new customer receives a setup call plus a data import from their previous system.

Part 3, draft C: "Which field service management systems keep working offline in the field?"

Why this question: Kalvenor Systems was named in 3 of 14 answers; Northvale FSM in 11, Verano FSM in 6.

Title	Meta description	H1	Suggested URL
Field Service Software That Works Offline	Compare Kalvenor Systems, Northvale FSM, Verano FSM and Asterforge on offline capability, contract terms and data export before you sign.	Which field service management systems keep working offline in the field?	/offline-field-service-software

Which field service management systems keep working offline in the field?

Short answer. Kalvenor Systems, Northvale FSM and Verano FSM all offer mobile apps that continue working without a signal. Asterforge's offline capability is [confirm: check Asterforge site for offline mobile details]. Before you sign with any vendor, check exactly what works offline, what contract length is required and how you can export your data.

How Kalvenor Systems handles offline work

Each morning, that day's jobs are downloaded to the technician's device. When there is no signal, technicians can open job details, view customer history and pull up equipment records without any connection.

While offline, technicians record time, parts, photos, checklists and customer signatures. All of that data syncs to the office automatically once the device finds a connection again. Card payments do require a connection, so the app holds the invoice in a queue until the technician is back online.

If two technicians edit the same job while one is offline, the app saves both sets of changes and flags the job for a dispatcher to review. Kalvenor's mobile app runs on both iPhone and Android phones and tablets.

Pricing and contract terms

Kalvenor Systems prices plans per technician each month, and every plan includes scheduling, dispatch and the offline mobile app. The Starter plan costs $59 per technician per month, billed annually, and covers scheduling, dispatch, the offline mobile app and invoicing. The Professional plan costs $89 per technician per month, billed annually, and adds recurring maintenance agreements, truck inventory and accounting sync.

There is no setup fee, and monthly billing is available at a higher rate with no annual contract required. Office users are included at no extra charge on any plan. Every plan comes with a 14 day trial that loads sample data so you can explore before committing.

Data export and integrations

You can export jobs, customers, invoices and inventory to CSV at any time. Invoices, payments and customer records sync in both directions with QuickBooks Online or Xero. Technician schedules can also be pushed to Google Calendar or Outlook.

A REST API with webhooks is available on the Professional and Enterprise plans. Kalvenor Systems is built for HVAC, plumbing and electrical contractors with 10 to 200 technicians.

Getting started

Every new customer receives a setup call and a data import from their previous system. Support is available by phone and chat from 7 a.m. to 8 p.m.. Kalvenor Systems has served trade contractors in the United States and Canada since 2014.

How the main options compare

The table below uses each vendor's own published information. Confirm any detail directly with the vendor before you sign.

Criterion	Kalvenor Systems	Northvale FSM	Verano FSM	Asterforge
Offline mobile capability	Jobs, time, parts, photos, checklists and signatures all work with no signal and sync when reconnected.	"The Northvale mobile app supports offline work orders on Android and iOS".	Work orders are stored on the device and sync when a connection returns.	[confirm: check Asterforge site for offline mobile details]
Who it is built for	HVAC, plumbing and electrical contractors with 10 to 200 technicians.	Service organizations with 50 or more technicians.	"Technicians who work in basements, plants and rural areas with poor signal".	Facilities and service teams needing work order and preventive maintenance software.
Published price	Starter: $59 per technician per month, billed annually. Professional: $89 per technician per month, billed annually.	Pricing is quoted per organization after a demo.	$95 per technician per month.	Standard: $45 per user per month. Plus: $75 per user per month.
Contract requirement	Annual billing available; monthly billing also available with no annual contract.	Annual contracts are required on all plans.	A one year contract is required.	[confirm: check Asterforge site for contract length details]
Data export	CSV export of jobs, customers, invoices and inventory is available at any time.	[confirm: check Northvale FSM site for CSV or data export details]	[confirm: check Verano FSM site for CSV or data export details]	[confirm: check Asterforge site for CSV or data export details]
Accounting integrations	Two-way sync with QuickBooks Online and Xero.	Connects to NetSuite and Microsoft Dynamics 365.	[confirm: check Verano FSM site for accounting integration details]	[confirm: check Asterforge site for accounting integration details]

Frequently asked questions

What exactly can a technician do in Kalvenor when there is no signal? Technicians can open job details, view customer history and equipment records, record time and parts, take photos, complete checklists and collect customer signatures, all without a connection. Everything syncs automatically once the device reconnects. Card payments are the one exception: those require a live connection, so the app queues the invoice for later.

Do I have to sign an annual contract with Kalvenor Systems? No. Annual billing is available and costs less per month, but monthly billing is also offered at a higher rate with no annual contract required. There is no setup fee on either option.

Can I take my data with me if I switch systems later? Yes. You can export jobs, customers, invoices and inventory to CSV at any time. Invoices, payments and customer records also sync with QuickBooks Online or Xero, so your accounting system holds a copy as well.

Subject: Add Kalvenor Systems to Field Service Review

```
Hi, I noticed Field Service Review covers field service management software, and I wanted to ask you to cons ider adding Kalvenor Systems. We serve HVAC, plumbing and electrical contractors with 10 to 200 technicians across the United States and Canada. Your directory looks like a useful resource for buyers in that space. I f you have a listing form or a process for adding vendors, I am happy to provide whatever details you need. Thank you for your time.

Subject: Suggestion: add Kalvenor Systems to your FSM roundup

```
Hi, I noticed your field service software roundup at Operations Weekly and wanted to suggest adding Kalvenor Systems. We make field service management software built for HVAC, plumbing and electrical contractors with 10 to 200 technicians. We cover scheduling, dispatch, invoicing and an offline mobile app, and we serve trade contractors across the United States and Canada. If you accept vendor submissions, I would be glad to send any details you need. Thank you for your time.

Sample, fictional company. Order SAMPLE-KALVENOR-FICTIONAL. Answers captured 2026-07-08 to 2026-07-12. Observed answers on stated dates, not a ranking. Every figure comes from the published method, v1.1.

Sample, fictional company. Every company, page and answer in this pack is sample data.

Part 6. The 30-day plan

When	Item	Artifact	Owner	Hours (estimate)	Check that proves it shipped
Week 1	Publish the answer page for "How does field service management software differ from general work order software?"	Part 3, draft A	Content lead	3	The page is live at a stable URL on kalvenor.example and linked from a hub page
Week 1	Ask hvacoperations.example to consider Kalvenor Systems for "HVAC Operations: field service platforms compared"	Part 5, request 1	Product marketing	0.5	Sent from a named company address and logged with the date; one follow-up at most
Week 1	Add Organization and Product JSON-LD and the sameAs list to the homepage	Part 4	Web lead	1.5	The Schema Markup Validator reads Organization and Product on https://kalvenor.example/
Week 1	Create or complete the Kalvenor Systems listing on fieldservicereview.example	Part 4, listings	Product marketing	1	fieldservicereview.example lists Kalvenor Systems on a dated check
Week 1	Publish the answer page for "Which platforms combine scheduling, invoicing and inventory for service teams?"	Part 3, draft B	Content lead	3	The page is live and linked from a hub page
Week 2	Publish the answer page for "Which field service management systems keep working offline in the field?"	Part 3, draft C	Content lead	3	Live and linked from a hub page
Week 2	Send the remaining inclusion requests	Part 5	Product marketing	1	Each request logged with its date
Week 2	Publish llms.txt at the site root	Part 4	Web lead	0.5	kalvenor.example/llms.txt returns 200
Week 3	Create or complete the remaining directory listings	Part 4, listings	Product marketing	2	Each site lists you on a dated check
Week 3	Link the new pages from the pages the engines already cite on your site	Part 3, internal links	Web lead	1	Each new page has two or more internal links in
Week 4	One follow-up on each request with no reply	Part 5	Product marketing	0.5	Follow-up logged; no second follow-up
Week 4	Verify every done check in this plan	Part 6	Head of marketing	1	Each row marked done with a date and a link

Day 30: the re-measure

The same 10 questions on the same five engines, three runs, same method, 30 to 60 days after delivery. Any further measurement is a separate scope agreed before payment.

The honest clause: a change counts only when the lowest re-measure run is above the highest baseline run. Today's highest run: 16 of 48. Anything else is reported as within run noise.

Sample, fictional company. Order SAMPLE-KALVENOR-FICTIONAL. Answers captured 2026-07-08 to 2026-07-12. Observed answers on stated dates, not a ranking. Every figure comes from the published method, v1.1.

Sample, fictional company. Every company, page and answer in this pack is sample data.

Part 7. Claims table and receipts appendix

Claims table

#	Where	Claim	Source	Read
1	Part 3, draft A	For example, Asterforge describes itself as "work order and preventive maintenance software for facilities and service teams".	R11 https://asterforge.example/	2026-07-13 (sample)
2	Part 3, draft A	It triggers recurring maintenance from asset records and meter readings, and its inventory module covers storeroom stock.	R12 https://asterforge.example/; R13 https://asterforge.example/	2026-07-13 (sample)
3	Part 3, draft A	We built Kalvenor Systems for HVAC, plumbing and electrical contractors with 10 to 200 technicians.	F4 https://kalvenor.example/	2026-07-13 (sample)
4	Part 3, draft A	Our platform handles scheduling, dispatch and invoicing, and the mobile app continues working even without a signal.	F2 https://kalvenor.example/	2026-07-13 (sample)
5	Part 3, draft A	A dispatcher can drag a job to a new technician on the live board, and the technician sees the update on their phone within seconds.	F5 https://kalvenor.example/	2026-07-13 (sample)
6	Part 3, draft A	When the job is done, the invoice is assembled from the recorded labor time and parts used, then synced to QuickBooks Online or Xero.	F8 https://kalvenor.example/	2026-07-13 (sample)
7	Part 3, draft A	Each morning, that day's jobs are stored on the device, so technicians can open job details, customer history and equipment records without any connection.	F29 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)
8	Part 3, draft A	Time entries, parts, photos, checklists and customer signatures are captured offline and sync automatically once the device reconnects.	F30 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)
9	Part 3, draft A	Card payments do require a connection, but the app queues the invoice so the technician can collect payment as soon as they are back online.	F32 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)
10	Part 3, draft A	Northvale FSM requires annual contracts on every plan.	R9 https://northvalefsm.example/pricing	2026-07-13 (sample)
11	Part 3, draft A	We offer monthly billing with no annual contract, though it is priced at a higher rate, and there is no setup fee on any plan.	F18 https://kalvenor.example/pricing	2026-07-13 (sample)
12	Part 3, draft A	We allow CSV export of all those record types whenever you need it.	F42 https://kalvenor.example/integrations	2026-07-13 (sample)

#	Where	Claim	Source	Read
13	Part 3, draft A	A REST API with webhooks is also available on our Professional and Enterprise plans.	F41 https://kalvenor.example/integrations	2026-07-13 (sample)
14	Part 3, draft A	Scheduling, dispatch, invoicing and mobile tools for trade contractors with 10 to 200 technicians.	F4 https://kalvenor.example/	2026-07-13 (sample)
15	Part 3, draft A	Field service management for service organizations with 50 or more technicians.	R2 https://northvalefsm.example/	2026-07-13 (sample)
16	Part 3, draft A	Work order and preventive maintenance software for facilities and service teams.	R11 https://asterforge.example/	2026-07-13 (sample)
17	Part 3, draft A	Jobs, time, parts, photos, checklists and signatures are captured offline and sync when the device reconnects.	F30 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)
18	Part 3, draft A	"The Northvale mobile app supports offline work orders on Android and iOS".	R4 https://northvalefsm.example/	2026-07-13 (sample)
19	Part 3, draft A	Invoices, payments and customers sync in both directions with QuickBooks Online and Xero.	F39 https://kalvenor.example/integrations	2026-07-13 (sample)
20	Part 3, draft A	Connects to NetSuite and Microsoft Dynamics 365 for accounting.	R5 https://northvalefsm.example/	2026-07-13 (sample)
21	Part 3, draft A	Monthly billing is available with no annual contract, and there is no setup fee.	F18 https://kalvenor.example/pricing	2026-07-13 (sample)
22	Part 3, draft A	Annual contracts are required on all plans.	R9 https://northvalefsm.example/pricing	2026-07-13 (sample)
23	Part 3, draft A	Plans are priced per technician per month; office users are included at no extra charge.	F13 https://kalvenor.example/pricing; F17 https://kalvenor.example/pricing	2026-07-13 (sample)
24	Part 3, draft A	Pricing is quoted per organization after a demo.	R7 https://northvalefsm.example/pricing	2026-07-13 (sample)
25	Part 3, draft A	Standard costs $45 per user per month; Plus costs $75 per user per month.	R15 https://asterforge.example/pricing; R16 https://asterforge.example/pricing	2026-07-13 (sample)
26	Part 3, draft A	Yes.	F19 https://kalvenor.example/pricing	2026-07-13 (sample)
27	Part 3, draft A	Every plan includes a 14 day trial with sample data already loaded so you can explore the platform right away.	F19 https://kalvenor.example/pricing	2026-07-13 (sample)
28	Part 3, draft A	You can export jobs, customers, invoices and inventory to CSV at any time.	F42 https://kalvenor.example/integrations	2026-07-13 (sample)

#	Where	Claim	Source	Read
29	Part 3, draft A	Professional and Enterprise plans also include a REST API with webhooks for more automated data access.	F41 https://kalvenor.example/integrations	2026-07-13 (sample)
30	Part 3, draft A	Yes.	F7 https://kalvenor.example/; F24 https://kalvenor.example/platform/dispatch	2026-07-13 (sample)
31	Part 3, draft A	On the Professional plan, recurring maintenance agreements generate visits on the schedule you set, with the checklist and parts list attached.	F7 https://kalvenor.example/	2026-07-13 (sample)
32	Part 3, draft A	Those visits appear on the dispatch board automatically.	F24 https://kalvenor.example/platform/dispatch	2026-07-13 (sample)
33	Part 3, draft B	Kalvenor Systems is field service management software built for HVAC, plumbing and electrical contractors with between 10 and 200 technicians.	F4 https://kalvenor.example/	2026-07-13 (sample)
34	Part 3, draft B	Scheduling, dispatch and invoicing are included in every plan, alongside a mobile app that continues to work without a signal.	F13 https://kalvenor.example/pricing	2026-07-13 (sample)
35	Part 3, draft B	Dispatchers move jobs by dragging them onto a live board, and technicians see the update on their phones within seconds.	F5 https://kalvenor.example/	2026-07-13 (sample)
36	Part 3, draft B	When a job is finished, an invoice is built automatically from the labor time and parts recorded on site, and it syncs to QuickBooks Online or Xero.	F8 https://kalvenor.example/	2026-07-13 (sample)
37	Part 3, draft B	Parts are tracked in the warehouse and on each truck.	F9 https://kalvenor.example/	2026-07-13 (sample)
38	Part 3, draft B	When a technician logs a part against a job, the quantity drops from that truck and the part appears on the invoice.	F36 https://kalvenor.example/platform/inventory	2026-07-13 (sample)
39	Part 3, draft B	A reorder alert fires when stock falls below the threshold you choose.	F9 https://kalvenor.example/	2026-07-13 (sample)
40	Part 3, draft B	Each morning, the day's jobs are stored on the device so technicians can open job details, customer history and equipment records even with no connection.	F29 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)
41	Part 3, draft B	Time, parts, photos, checklists and customer signatures are captured offline and upload automatically once the device reconnects.	F30 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)

#	Where	Claim	Source	Read
42	Part 3, draft B	Card payments do require a connection, and the app holds the invoice in a queue until the technician is back online.	F32 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)
43	Part 3, draft B	If two people edit the same job while one is offline, the app keeps both sets of changes and flags the job for a dispatcher to review.	F31 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)
44	Part 3, draft B	Northvale FSM also supports offline work orders on Android and iOS.	R4 https://northvalefsm.example/	2026-07-13 (sample)
45	Part 3, draft B	Kalvenor Systems plans are priced per technician per month and billed annually.	F13 https://kalvenor.example/pricing	2026-07-13 (sample)
46	Part 3, draft B	The Starter plan costs $59 per technician per month and covers scheduling, dispatch, the offline mobile app and invoicing.	F14 https://kalvenor.example/pricing	2026-07-13 (sample)
47	Part 3, draft B	The Professional plan costs $89 per technician per month and adds recurring maintenance agreements, truck inventory and accounting sync.	F15 https://kalvenor.example/pricing	2026-07-13 (sample)
48	Part 3, draft B	Monthly billing is available at a higher rate with no annual contract required.	F18 https://kalvenor.example/pricing	2026-07-13 (sample)
49	Part 3, draft B	You can export jobs, customers, invoices and inventory to CSV at any time.	F42 https://kalvenor.example/integrations	2026-07-13 (sample)
50	Part 3, draft B	Technician schedules can also be sent to Google Calendar or Outlook.	F40 https://kalvenor.example/integrations	2026-07-13 (sample)
51	Part 3, draft B	A REST API with webhooks is available on the Professional and Enterprise plans.	F41 https://kalvenor.example/integrations	2026-07-13 (sample)
52	Part 3, draft B	Northvale FSM requires annual contracts on all plans.	R9 https://northvalefsm.example/pricing	2026-07-13 (sample)

116	Part 3, draft C	Two-way sync with QuickBooks Online and Xero.	F39 https://kalvenor.example/integrations	2026-07-13 (sample)
117	Part 3, draft C	Connects to NetSuite and Microsoft Dynamics 365.	R5 https://northvalefsm.example/	2026-07-13 (sample)
118	Part 3, draft C	Technicians can open job details, view customer history and equipment records, record time and parts, take photos, complete checklists and collect customer signatures, all without a connection.	F29 https://kalvenor.example/platform/mobile-offline; F30 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)
119	Part 3, draft C	Everything syncs automatically once the device reconnects.	F30 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)
120	Part 3, draft C	Card payments are the one exception: those require a live connection, so the app queues the invoice for later.	F32 https://kalvenor.example/platform/mobile-offline	2026-07-13 (sample)
121	Part 3, draft C	No.	F18 https://kalvenor.example/pricing	2026-07-13 (sample)

#	Where	Claim	Source	Read
122	Part 3, draft C	Annual billing is available and costs less per month, but monthly billing is also offered at a higher rate with no annual contract required.	F18 https://kalvenor.example/pricing	2026-07-13 (sample)
123	Part 3, draft C	There is no setup fee on either option.	F18 https://kalvenor.example/pricing	2026-07-13 (sample)
124	Part 3, draft C	Yes.	F42 https://kalvenor.example/integrations; F39 https://kalvenor.example/integrations	2026-07-13 (sample)
125	Part 3, draft C	You can export jobs, customers, invoices and inventory to CSV at any time.	F42 https://kalvenor.example/integrations	2026-07-13 (sample)
126	Part 3, draft C	Invoices, payments and customer records also sync with QuickBooks Online or Xero, so your accounting system holds a copy as well.	F39 https://kalvenor.example/integrations	2026-07-13 (sample)
127	Part 4	Organization description: Kalvenor Systems schedules, dispatches and invoices field work, and its mobile app keeps working offline.	https://kalvenor.example/	2026-07-13 (sample)
128	Part 4	Product description: Kalvenor Systems schedules, dispatches and invoices field work, and its mobile app keeps working offline.	https://kalvenor.example/	2026-07-13 (sample)
